UJJWAL KATIYAR

Noida, India
+91 7309324025 | contact@ujjwalkatiyar.in | LinkedIn | GitHub | Leetcode

PROFESSIONAL SUMMARY

Full Stack Engineer specializing in real-time web applications, scalable systems, and high-performance backend development, with hands-on experience across end-to-end product development. Currently pursuing a Bachelor's in Computer Science with a specialization in Artificial Intelligence, combining knowledge of data structures, algorithm, and systems design with real-world engineering work.

EDUCATION

IIMT College Of Engineering, Greater Noida **OCT.2023–2027 (Expected)**
Bachelor of Technology in Computer Science & Engineering, Specialization in Artificial Intelligence **Overall CGPA 7.4/10**

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C/C++, HTML/CSS
Frontend: React.js, Next.js, Tailwind CSS, Redux Toolkit
Backend: Node.js, Express.js, FastAPI, REST APIs, JWT, OAuth, Mongoose, Prisma, Kafka, WebSockets, Redis
Databases: MongoDB & PostgreSQL
DevOps: Docker, Git/GitHub, CI/CD, Railway
Concepts: Distributed Systems, Microservices, System Design, Real-Time Architecture, Event-Driven Architecture

EXPERIENCE

Wokegenics Solutions Private Limited **June 2026 – August 2026**
Full Stack Developer Intern **Remote**

- Optimized application performance using Redis caching and pagination, reducing response times and improving overall system performance by **~ 30%**.
- Refactored backend REST APIs and database queries, reducing average response time from ~ **250ms to ~ 80ms**.
- Built a feature that enabled users to publish content on multiple social media platform directly from the application.

TECHNICAL SKILLS

Exchange-X | TypeScript, Node.js, Next.js, Redis, Kafka, MongoDB, WebSockets ***Live Demo*** | ***GitHub***

- Designed and developed a cryptocurrency exchange platform enabling users to place real-time buy and sell orders with live prices feeds and instant wallet updates, built to handle high-throughput concurrent orders.
- Implemented a price-priority Order Matching Engine and order book by integrating Kafka for high-throughput order processing, Redis for caching, and WebSockets for real-time price/order updates.
- Achieved 100% success on **150k+ orders at 2,606 req/sec (1.06ms min latency)** by load testing with Grafana k6 across 1,000 concurrent users.

CRM-X | TypeScript, Node.js, Next.js, PostgreSQL, OpenAI, Tailwind CSS, TanStack Table ***Live Demo*** | ***GitHub***

- Built an AI-powered CRM tool that enables businesses to manage leads end-to-end, cutting manual lead tracking and letting users send emails directly from the dashboard.
- Integrated an AI email generator tool using the OpenAI OSS 120B model, allowing users to generate personalized client emails directly within the CRM dashboard.

ACHIEVMENTS

- Secured **1st Place** in the Bharat Shiksha Hackathon 2025
- Achieved **1st Place** in the College Internal Round of Smart India Hackathon 2025
- Received the Director's Recognition Award at NIT Delhi for organizing Fetch-a-thon 2.0

EXTRACURRICULAR ACTIVITES

- Led technical operations for MIH 3.0 and MIH 4.0, 30-hour hackathons attended by 1000+ participants, managing registration systems, evaluation infrastructure, QR-based check-ins, and live event support.
- Co-Organized a 12-hour uAgent-empowered hackathon at NIT Delhi in collaboration with Fetch.ai.
